SUMMARY

Computer Engineering student with hands-on experience building backend services, full-stack applications, and automated tests. Developed Java / Spring Boot microservices with REST APIs, JWT/RBAC, Docker, and CI/CD; published an independent Flutter strategy game. Interested in software engineering, backend systems, and AI-powered products.

EDUCATION

Koç University | Bachelor's Degree in Computer Engineering

August 2022 – Expected June 2027

PROFESSIONAL EXPERIENCE

Siemens — Part-Time Student Engineer (Test Automation)

February 2026 – September 2026

- Contributed to automated test development and maintenance for enterprise software using Java and test tooling.
- Designed and executed functional and regression tests; collaborated with developers and QA teams on defects and reliability.
- Worked with API testing and development workflows involving Git, CI/CD, and containerized environments.

Tegsoft — QA Intern (Test Engineering)

July 2025 – October 2025

- Executed manual, functional, regression, and exploratory tests for web-based omnichannel software.
- Used BrowserStack for cross-browser/device checks; reported defects and documented test results.

PROJECTS & RESEARCH

ChargeSquare — EV-Charging Backend (Microservices Case Study)

July 2026 · Java, Spring Boot, PostgreSQL, Docker, Kubernetes, React

- Built three Spring Boot services for Station, Session, and Wallet flows with synchronous REST integration.
- Implemented guarded state transitions, decimal-safe billing, retry-safe stop requests, and JWT-based RBAC.
- Added React operations UI, Docker Compose, Kubernetes manifests, GitHub Actions CI, and automated tests.

Vivideo Automations — Workflow Automation Case Study

2026 · React, TypeScript, Zustand, Vitest

- Built and deployed a configurable workflow prototype with scheduling, run history, and execution simulation.
- Implemented a rule-based planner, credit accounting, failure/cancellation handling, and automated unit tests.

Hospital Management System — Full-Stack Web App

January 2026 · Next.js, TypeScript, Prisma ORM, SQLite

- Built a full-stack hospital administration app for patient records, appointments, and staff management.
- Developed an admin dashboard with analytics and type-safe persistence using Prisma ORM.

TOWERS — Published Mobile Strategy Game

2025 – 2026 · Flutter, Dart, Game AI

- Designed and published a cross-platform 8×8 mobile strategy game with custom board mechanics.
- Implemented game rules and AI-based move selection; prepared production build and release.

Dungeon KUrawler — Java Dungeon-Crawler Game (Team Project)

2025 · Java, JavaFX, MVC, JUnit 5

- Collaborated on a layered JavaFX game using MVC and an Action–Effect pipeline for gameplay state changes.
- Includes procedural map generation, enemy behaviors, a visual level editor, JSON saves, and JUnit tests.

LEADERSHIP

KUAV Captain / KUAIRS Vice President (2023–2025): Led student technical initiatives, coordinated teams, and organized AI-focused workshops.

SKILLS & QUALIFICATIONS

- Backend: Java, Spring Boot, Python, FastAPI, REST APIs, JWT/RBAC
- Web / Mobile: Next.js, TypeScript, React, Flutter (Dart)
- Databases: PostgreSQL, SQLite, Prisma ORM
- DevOps: Docker, Kubernetes, GitHub Actions CI/CD, Git
- Testing: Postman, BrowserStack, JIRA, regression tests
- Other: C, Agile/Scrum

LANGUAGES

Turkish — Native | English — Professional
