SUMMARY

Computer Engineering student specializing in Quality Assurance and Test Engineering. Experienced in manual and automated testing, test case design, bug reporting, and test execution. Hands-on experience with BrowserStack, regression testing, and QA methodologies. Background in software development and embedded systems, providing a strong foundation for test automation and problem-solving. Seeking opportunities to grow in QA, automation testing, and software validation.

EDUCATION

Koç University | Bachelor's Degree in Computer Engineering

August 2022 – Expected June 2027

- Pursuing a strong focus on AI and Computer Vision, with coursework in Machine Learning, AI, and Robotics.

PROFESSIONAL EXPERIENCE

Tegsoft | QA Intern (Test Engineering)

July 2025 – Present

- Writing, executing, and maintaining manual & automated test cases for call center/omnichannel software.
- Performing functional, regression, and exploratory testing on web-based platforms.
- Utilizing BrowserStack for cross-browser and cross-device testing.
- Collaborating with developers to report and track defects, ensuring timely fixes.
- Supporting test automation initiatives and documenting QA processes.

Koç University Technical Leadership Roles

September 2023 – July 2025

- Led a multidisciplinary UAV team (KUAV), managing project timelines, coordinating subteams, and overseeing external collaborations.
- Organized AI-focused events and technical workshops (KUAIRS), collaborating with industry experts and fostering teamwork.

PROJECTS & RESEARCH

Aurora AI – Intelligent Marketing Assistant

April 2025 – Present

- Developed an AI-powered assistant designed to support marketing tasks such as content generation, campaign support, and customer engagement.
- Designed and executed validation tests to ensure accuracy, reliability, and relevance of AI-generated outputs.

Indie Mobile Game Development (2D)

March 2025 – May 2025

- Designed and developed a 2D mobile game focusing on interactive gameplay and user engagement.
- Conducted functional and performance testing to ensure smooth gameplay, bug-free mechanics, and cross-device compatibility.

Konuş Kazan – Web-Based Educational Game

March 2025 – Present

- Built an interactive educational board game using HTML, CSS, and JavaScript.
- Performed functional and usability testing to validate gameplay mechanics, scoring, and user interaction.

TÜBİTAK 2204-A National Science Competition – 3rd Place in Turkey

April 2021 – June 2021

- Designed and tested an autonomous oxygen concentrator system, successfully validated in a simulated patient environment.

SKILLS & QUALIFICATIONS

- Manual & Regression Testing (functional, exploratory)
- Test Case Design & Execution, Bug Reporting
- Test Tools: BrowserStack, JIRA, Git, Selenium (basic)
- API & Database Testing (Postman, SQL – basic)
- Programming: Python (automation), C / Java
- Web Development: HTML, CSS, JavaScript
- Leadership & Teamwork, Problem Solving
- Agile / Scrum Collaboration, Communication Skills

LANGUAGES

- Turkish – Native
- English – Professional Working Proficiency
