SUMMARY

Computer Engineering student focused on backend software engineering and test automation. Builds and tests scalable systems — Java / Spring Boot microservices (REST, JWT/RBAC, Docker, Kubernetes, CI/CD) — and founded TOWERS, a release-ready Flutter strategy game. Passionate about building reliable, high-performance systems.

EDUCATION

Koç University | Bachelor's Degree in Computer Engineering

August 2022 – Expected June 2027

- Strong foundation in software engineering and AI through hands-on product development and automation experience; relevant coursework in Operating Systems, ML, and Computer Vision.

PROFESSIONAL EXPERIENCE

Siemens — Part-Time Student Engineer (Test Automation)

February 2026 – Present

- Contribute to development and maintenance of automated test frameworks for enterprise-level applications.
- Design and execute automated test cases to validate system functionality, performance, and reliability.
- Support CI/CD pipelines by integrating automated test suites; collaborate with developer, QA, and DevOps teams.

Tegsoft | QA Intern (Test Engineering)

July 2025 – October 2025

- Wrote, executed, and maintained manual & automated test cases for call center / omnichannel software.
- Performed functional, regression, and exploratory testing on web platforms; BrowserStack cross-browser/device testing.
- Collaborated with developers to report and track defects; documented QA processes.

PROJECTS & RESEARCH

ChargeSquare — EV-Charging Backend (Microservices Case Study)

July 2026 · Java, Spring Boot, PostgreSQL, Docker, Kubernetes, React

- Built a 3-service Spring Boot backend (Station / Session / Wallet) over a shared PostgreSQL for a full start → stop → bill → settle EV-charging flow, with real synchronous REST calls between services.
- Implemented a guarded start/stop state machine, decimal-safe billing (BigDecimal), and two-layer **idempotency** so a retried stop never double-charges.
- Added stateless **JWT authentication** and role-based access control (RBAC) enforced server-side across all services, plus a React operations panel.
- Containerized with Docker Compose (one-command run), wrote Kubernetes manifests and a GitHub Actions CI pipeline; 23 automated tests incl. a Testcontainers integration test. github.com/yenikosebatuhan/chargesquare-case-study

Hospital Management System — Full-Stack Web App

January 2026 · Next.js, TypeScript, Prisma ORM, SQLite

- Built a full-stack hospital management system with an admin panel for patient records, appointments, staff management, and analytics.
- Developed with Next.js & TypeScript, using Prisma ORM over SQLite for type-safe data access; one-command local setup.

TOWERS — Strategy Board Game (Flutter, Mobile)

November 2025 – January 2026 (Release-Ready)

- Designed and developed a cross-platform 2D strategy board game using Flutter (Dart) with a custom 8×8 game engine and dynamic tower-stacking mechanics.
- Developed AI-based move validation and rule enforcement for deterministic gameplay and fair competition.
- Prepared the app for Play Store deployment: build optimization, asset compression, production configuration.

Shell-ish — Unix-Style Shell (C)

2026 · C, Operating Systems

- Implemented an interactive Unix-style shell in C — command parsing/execution, I/O redirection, pipes, and background processes — for an operating-systems course (COMP 304).

Koç University Technical Leadership Roles

September 2023 – July 2025

- Led a multidisciplinary UAV team (KUAV): managed project timelines, coordinated subteams, oversaw external collaborations.
- Organized AI-focused events and technical workshops (KUAIRS) with industry experts, fostering teamwork.

SKILLS & QUALIFICATIONS

- Backend:** Java, Spring Boot, REST APIs, JWT / RBAC, PostgreSQL / SQL
- DevOps:** Docker, Kubernetes, CI/CD (GitHub Actions), Git
- Languages:** Java, Python (automation), C, JavaScript; React, Flutter (Dart)
- Testing:** Manual & regression (functional, exploratory), test design, bug reporting
- Test Tools:** BrowserStack, JIRA, Selenium (basic), Postman
- Soft Skills:** Agile / Scrum, leadership & teamwork, problem solving, communication
- Languages:** Turkish (Native), English (Professional)
